Professor of Aging Research, Indiana University Center for Aging Research
Senior a Research Scientist, Regenstrief Institute

III. Open Discussion & Questions

Gloria Sachdev
President & CEO, Employers' Forum of Indiana

Biography

Malaz Boustani, MD, MPH

Dr. Malaz Boustani is a geriatrician, an innovator, and an implementation scientist with vast experience in conducting research focused on developing tools, processes and strategies for implementing evidence-based, cost-effective healthcare solutions in the real world. He is the Director of Senior Care Innovation at Eskenazi Health, the Founding Director and Chief Innovation and Implementation Officer for the Sandra Eskenazi Center for Brain Care Innovation, the Richard M Fairbanks Professor of Aging Research at Indiana University Center for Aging Research, and a Senior a Research Scientist at Regenstrief Institute.

As the Founding Director and Chief Innovation Officer of Center for Health Innovation and Implementation Science (CHIIS) at Indiana University School of Medicine (IUSM), Dr. Boustani is passionate about improving patient outcomes, lowering costs and creating better experiences for both patients and clinicians. His specific focus is accommodating the needs of cognitively impaired patients, both in the general population and particularly for those with dementia. He is a vocal and internationally visible advocate for older adults.

Over the years through his clinic at Eskenazi Health, he developed Agile Implementation, a proven evidence-based change methodology designed specifically to improve healthcare. In addition to creating Agile Implementation, he has developed the Health Innovation and Implementation Science graduate certificate program, offered through IUSM, to generate change agents passionate about transforming healthcare. He also serves as a mentor to many junior faculty, sharing his enthusiasm for disruptive innovation with a new generation of clinicians and researchers.
