

Empowering Employers to Address COVID-19 Vaccine Confidence

Hospital COVID-19 Dashboards Living Document Last Updated: July 9, 2022

NEW Ongoing Forum Project: Hospital Dashboards noting Vaccinated vs Unvaccinated Status

Assess which hospitals have such dashboards

Encourage all hospitals to create vax/unvax dashboards

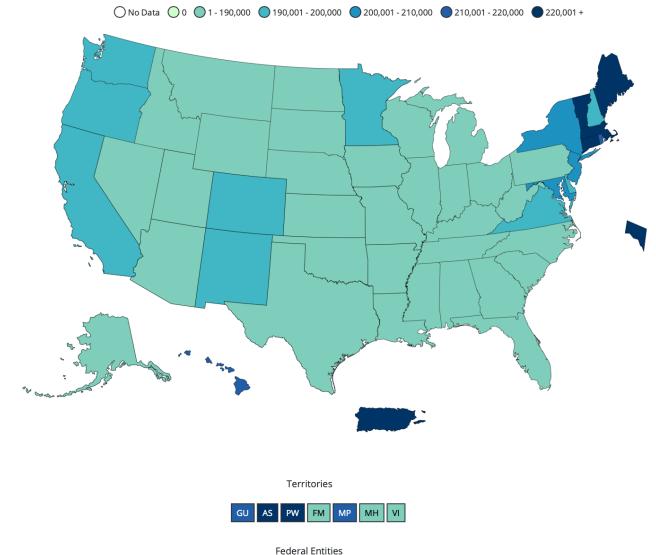

Forum maintains a living document of hospital dashboards, updated every month

Empower employers and all stakeholders to be evidencebased

National Data

Total Doses Administered Reported to the CDC by State/Territory and for Select Federal Entities per 100,000 of the Total Population

Considerations for COVID-19 Dashboard

- Hospitals: If we missed your COVID-19 dashboard, please put the link in the chat box now or email me or Sara Otte and we'll update our living Dashboard document (posted on the Forum website----Initiatives--- Coronavirus Help).
- For hospitals considering this opportunity:
 - Display on a prominent location on your website (i.e. under the COVID-19 information center), distribute it via social media
 - What to display: COVID-19 patients vaccinated vs. unvaccinated:
 - Hospitalizations
 - ICU
 - Ventilator
 - Deaths
 - Update: weekly or bi-monthly
 - Utilize numbers from your own hospital or health system
