

## **Review of the 2026 Indiana Hospital Association-Commissioned Kaufman Hall Report on Indiana Hospital Finances**

January 29, 2026

The Indiana Hospital Association has released a report it commissioned from Kaufman Hall on Indiana hospital finances.<sup>1</sup> The report develops projections of several metrics using only eight months of 2025 data from **53 selected** — but undisclosed — hospitals. It uses simulations to estimate future operating margins for these 53 undisclosed hospitals.

The Employers' Forum of Indiana (EFI) has reviewed this report and determined that there is not sufficient information disclosed to allow us to replicate its findings.

We can, however, review the financial performance of Indiana's 114 general acute care hospitals using publicly available data submitted and signed off on by the hospitals. For clarity, we will first provide definitions of certain metrics:

**Net Patient Revenue:** Gross patient charges, minus contractual discounts, bad debt and charity care allowances and other deductions agreed to by the hospital. Numbers reported from hospital's accounting records.

**Hospital Operating Expenses:** As recorded in hospital accounting records.

**Operating Margin:** Net Patient Revenue less Hospital Operating Expenses

**Other Income and Expense:** Income and Expenses not related to hospital operations, such as investment income, donations and contributions, cafeteria operations, etc.

**Net Income (Loss):** Net Patient Revenue, minus Operating Expenses, plus Other Income and Expense. Represents earnings retained by the hospital, also known as "the bottom line."

**Net Profit Margin:** Net Income divided by Net Patient Revenue, representing the percentage of Net Patient Revenue retained by the hospital.

The Kaufman Hall report concentrates on operating margins, ignoring investment income, donations and contributions, and income from other operations and sources such as cafeterias, parking, government or research grants, retail pharmacies and medical supply sales, rent revenue and more. EFI, on the other hand, focuses on net income (i.e., the bottom line), the amount retained by a hospital after all income and expenses are accounted for, as the appropriate measure of financial performance.

The difference between operating margins and net profit margins is substantial.

Using Medicare Cost Report information for the nation, as made available by the National Academy for State Health Policy (NASHP)<sup>2</sup> we find that, for Indiana's 114 general acute care hospitals, operating margin losses are higher than the national average, but **net profit margins are 43% above the national average**.

<sup>2</sup> ["Hospital Cost Tool,"](#) National Academy for State Health Policy, accessed January 27, 2026.

	Operating Margin	Net Profit Margin
Indiana	-4.8%	12.9%
National	-3.9%	9.0%

Source: Derived from 2024 Medicare Cost Reports, National Academy for State Health Policy

To be clear, this does not mean that all of Indiana's 114 general acute care hospitals are profitable. In fact, we have a bifurcated market where some hospitals are extremely profitable while others are clearly struggling.

Net Profit Margin Range	Number of Acute Care Hospitals	Revenue	Net Income	Average Revenue	Net Profit Margin
20% to 37%	21	\$11,075,349,223	\$2,992,511,674	\$527,397,582	27.0%
10% to 19%	30	\$7,708,246,617	\$1,015,899,998	\$256,941,554	13.2%
0% to 10%	31	\$8,148,051,261	\$475,737,961	\$262,840,363	5.8%
-1% to -10%	16	\$2,247,849,659	\$(105,706,255)	\$140,490,604	-4.7%
Below -10%	16	\$2,245,741,350	\$(336,889,134)	\$140,358,834	-15.0%
<b>Totals</b>	<b>114</b>	<b>\$31,425,238,110</b>	<b>\$4,041,554,244</b>	<b>\$275,659,983</b>	<b>12.9%</b>

Source: 2024 Medicare Cost Reports, National Academy for State Health Policy

This phenomenon of a bifurcated market is consistent with the findings of a December 2025 study by the Center for Advancing Health Policy Through Research at Brown University that concluded:

"This study highlights the unequal financial conditions of Indiana CAH (critical access hospitals) and rural hospitals based on system affiliation. Independent Indiana CAH and rural hospitals have low, and in many cases, negative operating margins. In contrast, system affiliated CAHs and rural hospitals in Indiana average positive overall operating margins."<sup>3</sup>

Publicly available data does not support a uniform narrative of financial distress across Indiana's general acute care hospitals. Instead, there is significant variation in financial performance across the state. Maintaining access to care requires a data-driven, targeted policy approach — one that reflects these differences and aligns policy decisions with the complete financial realities of Indiana's hospitals.

EFI recognizes that some Indiana hospitals are facing real financial challenges and that maintaining access to care in those communities must remain a priority. At the same time, publicly available data show that the average net profit margin of Indiana's general acute care hospitals is 43% above the national average, underscoring that operating margins alone do not provide a full picture of financial viability. Policymakers should therefore rely on complete financial data and pursue targeted solutions that protect access where it is most at risk while appropriately accounting for financial capacity of the state's most profitable hospitals.

**Note:** Please see the appendix for additional information.
